EDUCATION

University of Dhaka **(January 2022 - January 2026)**
BSc in Software Engineering

EXPERIENCE

Python Instructor at Short Course, IIT, University of Dhaka **(April 2026 - Present)**
Delivered training on Python programming and data analysis, covering core concepts, data structures, and file handling. Taught Pandas-based data analysis and data visualization with Matplotlib through hands-on exercises.

Software Developer at The Royal Scientific Publications **(2025 - Present)**
Developed and maintained the Big Bang SMS Sender, a bulk messaging platform sending 1,500+ daily SMS to students and guardians. Handled full development and ongoing maintenance, ensuring efficient, reliable, and scalable communication via Excel-based uploads.

Software Engineering Intern at Aramco (SYNC Project, Ithra) **(March 2025 - August 2025)**
Developed the Global Policy Tracker, a full AI-powered policy intelligence platform. Built end-to-end features using Next.js, FastAPI, AWS DynamoDB, and deployed the full system on render. Implemented global visualization, policy submission, admin approval, policy evaluation logic, and AI-assisted analytics.

ICT & Database Management Associate at SPSU, University of Dhaka **(May 2024 - March 2025)**
Managed and updated the SPSU student database and secure records. Handled data entry, verification, and system troubleshooting. Provided ICT support to staff and students, helping maintain smooth and reliable operations.

Teaching & Content Development (Udvash & Roots Edu) **(March 2022 - present)**
Created and reviewed academic question sets for Udvash and Roots Edu, used nationwide by 40,000-50,000+ students in admission test prep exams, ensuring content accuracy and effective large-scale assessment.

PROJECTS

GitIntel: Python, PyDriller, GitPython, Tkinter, Gemini API, AWS Bedrock (GitIntel**)**
Developed an autonomous tool to compute 65 static metrics and generate benchmark-aligned datasets. Engineered a "Multi-LLM Jury" to independently unit-test custom metrics, ensuring hallucination-free dataset generation.

Policy Tracker: Next.js, FastAPI, AWS, ReactGlobe, Render (Policy Tracker**)** (https://policy-tracker-f.onrender.com)
Manage and compare policies across countries with an interactive dashboard, color-coded world maps, AI-powered analysis, real-time updates, and smooth document management.

PrescribeCorrect: Spring Boot, Next.js, PostCSS, Render (PrescribeCorrect**)** (https://prescribe-correct.vercel.app**)**
An AI-powered healthcare platform for simplifying medical data analysis and clinical workflows, featuring OCR-based prescription analysis, report structuring, doctor & patient management, and real-time chat.

Stack OverFlow: React.js Node.js, MongoDB, Express.js (stack overflow**)**
Built a MERN-based app with user registration, login, post management, and JWT authentication. Added notification cleanup and MinIO for code snippet storage, transitioning to a distributed setup.

IPOS: React.js Node.js, MongoDB, Express.js (IPOS SPL-ll**)**
Designed a portal for managing internship applications with company listings, skill-based filtering, CV uploads, automated emails, and HR letter generation for IIT students, University of Dhaka.

Chat Server: C++(Chat server SPL1**)**
Implemented a secure chat system with AES encryption, login controls, and real-time group/individual messaging. Included retry-limited authentication and encrypted data transfer.

AWARDS & ACTIVITIES

Industrial Responsible AI Summit, MIST **2026**
Secured 2nd Runner-Up in the project showcase for developing PrescribeCorrect, an AI-powered prescription analysis platform supporting both English and Bengali. The system digitizes handwritten prescriptions, extracts medical information, and includes MediBot, a context-aware AI assistant for general healthcare guidance.

Micro-Ops Hackathon, CUET CSE Fest **2025**

Achieved a Top 10 position among 50 finalist teams, gaining hands-on experience with real-world DevOps and Micro-Ops workflows, including Docker, CI/CD pipelines, cloud deployment, system architecture design, and monitoring using Prometheus and Sentry.

Javafest 2025 - Therap (BD) **2025**

Participated in Javafest 2025 organized by Therap (BD), where we built MediLens, an AI-based medical prescription analysis platform for the Bangladeshi healthcare ecosystem with Bengali and English support, OCR-based prescription reading, and real-time AI-driven analysis.

BEAR Summit & National Semiconductor Symposium **2025**

Attended national sessions on semiconductor innovation, ICT infrastructure, and future digital technologies organized by ICT Division & Bangladesh Computer Council (BCC).

AI Olympiad Bangladesh - Finalist **2025**

Selected as a finalist in the national-level AI Olympiad organized by DIPTI & Daffodil International University (in collaboration with Prothom Alo), showcasing strong proficiency and enthusiasm in Artificial Intelligence and emerging technologies.

District Champion at Creative Talent Hunt Competition (Math & Computer) **2019**

National Champion at Bangladesh Red Crescent Society (Essay Writing) **2014**

Competitive Programming Contest

Participated in 50+ programming contests on platforms like CodeForces, LeetCode (top 28%), CodingNinjas, HackerRank, Geeksforgeeks and CodeChef. Solved over 600 problems across various platforms.

SKILLS

Language: C, C++, Python, JavaScript, Java (in order of proficiency)
Technology / Tools: FastAPI, Next.js, Git, React, Node.js, Express.js, MongoDB, Github, HTML, CSS, Sqlite3, Kali Linux, WireShark, Render, AWS, Vercel.
